DETAILED ACTION

Claim Objections

Claims 2-4 are objected to because of the following informalities: Claims 2-4, Lines 3-5 include several reference characters many of which have nothing to do with the recited element and should be removed. Appropriate correction is required.

Claims 7-18 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-6, 19, and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is

Art Unit: 3745

(a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949).

In the present instance, claim 1 recites the broad recitation "means for the influencing of the transmission ratio", and the claim also recites "in particular for the influencing of the circulation flow" which is the narrower statement of the range/limitation.

In the present instance, claim 6 recites the broad recitation "uneven", and the claim also recites "in particular curved" which is the narrower statement of the range/limitation.

Claims 4-6 recite the limitations "the front sides" or "the front side" in Lines 1-2. There is insufficient antecedent basis for these limitations in the claim.

Claims 19 and 20 recite a "Procedure for the influencing" which appears to be a method claim, but does not include any method steps.

Claims 2 and 3 are rejected due to their dependence from claim 1.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3745

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Eta (DE 1196438).

Eta discloses a hydrodynamic clutch with a primary impeller (P) and a secondary impeller (T) forming a working chamber, and an element (3, 12, 16) forming an interference or baffle region extending into the working chamber that is axially displaceable. Wherein the element is implemented as a washer segment having front sides arranged in parallel (12, 16) or a front side (4) with an uneven inclination.

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patents 3260052, 4043434, 4094143, RE29928, 4625512, and 6898931 each disclose a hydrodynamic clutch having a flow controlling baffle.
